

# project „HyTechHafen Rostock“

## Initial project of the strategy „Energiehafen Rostock“

<b>Challenge</b>	Conversion of the national economy to green gases, Initially, mainly through the creation of large clusters based on their infrastructure and energy potential
<b>Solution</b>	Establish Rostock with power plant site and infrastructure as industrial site for large-scale electrolysis (100+ Mw) with complete H2 value chain incl. pipeline connection
<b>Use</b>	Seaport/Rostock region as THE center/hub in German Baltic Sea for emerging hydrogen economy
