

# HyTechHafen

## Initial project of the "Energy Port" strategy

<b>Challenge</b>	Initiation of a domestic market through an integrated industrial project with 100 MW of electrolysis capacity.
<b>Solution</b>	Establishment of the complete H2 value chain up to ammonia, fed from regional renewable electricity and seaport integration into European H2 pipeline.
<b>Use</b>	Rostock seaport as a multimodal hub for H2 and its derivatives in the German Baltic Sea region
